AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The Southern California Metropolitan Water District (MWD)

(applicant) has applied to the Fish and Wildlife Service (Service) for a 50-year Incidental Take Permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (Act). The proposed permit would authorize take of five currently listed wildlife species, including the endangered Stephens' kangaroo rat (*Dipodomys stephensi*) (SKR), the endangered bald eagle (*Haliaeetus leucocephala*), the threatened coastal California gnatcatcher (*Polioptila californica californica*), the endangered least Bell's vireo (*Vireo bellii pusillus*), and the endangered southwestern willow flycatcher (*Empidonax traillii extimus*), in western Riverside County, California. In addition, the applicant is seeking authorizations and assurances for 60 other target species (including one currently listed plant species, and 59 plant and animal species not currently listed) that occur within the plan area. This notice opens the comment period on the joint Environmental Assessment/Mitigated Negative Declaration (EA/MND), and permit application package, which includes the Lake Mathews Multiple Species Habitat Conservation Plan and Natural Community Conservation Plan (Plan) and Implementing Agreements (IA). All comments received, including names and addresses, will become part of the administrative record and may be made available to the public.

DATES: Written comments on the Plan, the EA/MND, or the IA should be received on or before September 25, 1995.

Background Information

Listed species are protected pursuant to section 9 of the Act against "take", that is, no one may harass, harm, pursue, hunt, shoot, wound, kill, trap, capture or collect the species, or attempt to engage in such conduct (16 USC 1538). The Service, however, may issue permits to conduct activities involving endangered species under certain circumstances, including carrying out scientific purposes, enhancing the propagation or survival of the species, or incidentally taking the species in connection with otherwise lawful activities. Regulations governing permits for endangered and threatened species are at 50 CFR 17.22 and 17.32. The proposed takings are incidental to otherwise lawful activities in association with the implementation of the Plan, a joint conservation effort initiated by the applicant (a 27-member public entity that delivers water from the California and Colorado River Aqueducts to cities and communities within a 5,125-square-mile service area in southern California) and the Riverside County Habitat Conservation Agency (RCHCA), in cooperation with the Service and the California Department of Fish and Game (CDFG).

Implementation of the proposed Plan could directly or indirectly affect individuals of five currently listed animal species (identified above). In addition, one listed plant species, slender-horned spineflower (*Dodecahema leptoceras*), is also known to occur in the vicinity of Lake Mathews. Although no incidental take authorization is required for listed plant species, impacts to these species must be addressed in the intra-Service consultation required pursuant to section 7(a) of the Act. The Plan establishes and provides management for a 5,110-acre multiple species reserve on the applicant's properties in western Riverside County (the Plan Area). The Multiple Species Reserve consists of a 2,545-acre mitigation bank adjacent to an existing 2,565-acre State Ecological Reserve. The mitigation bank provides mitigation for the applicant's ongoing and future operations, maintenance activities, and capital construction projects at Lake Mathews (totaling approximately 618 acres). Future MWD projects outside the Plan Area can use additional credits remaining in the mitigation bank pursuant to the Mitigation Banking Agreement in Volume 3 of the application package. The RCHCA will receive habitat credit for the 1,269.3 acres of occupied SKR habitat within the Plan Area under the SKR Short-term Habitat Conservation
